Dashboard Structure

- Header
- Sidebar
- Body

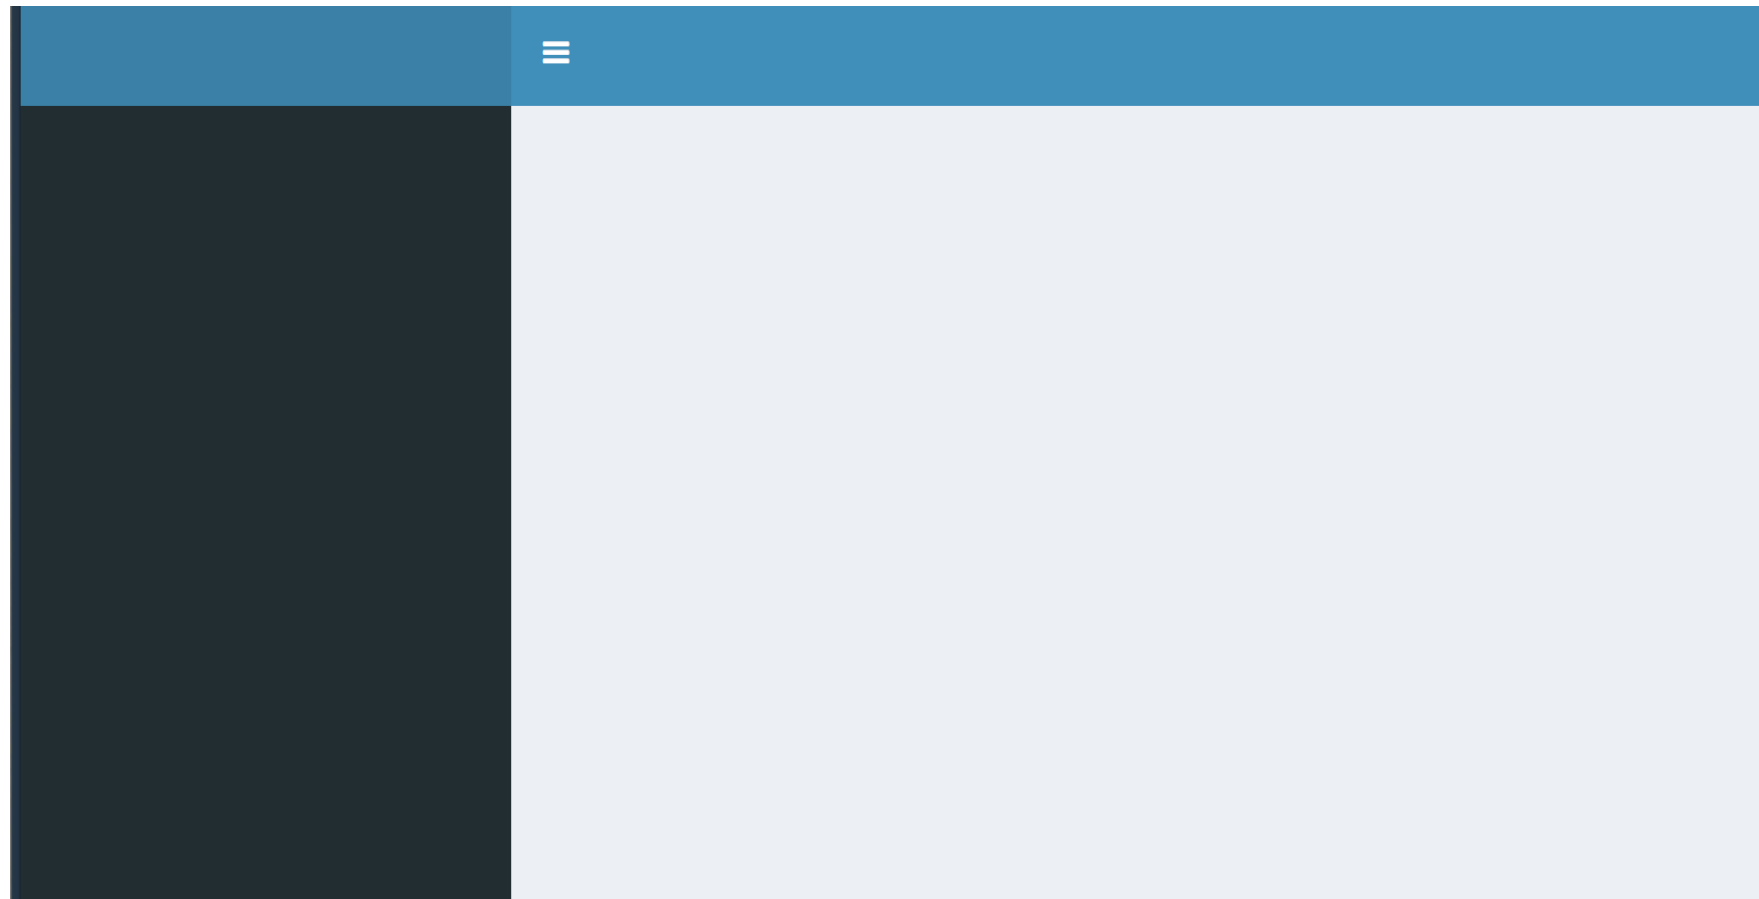

Empty Dashboard

```
library("shinydashboard")  
header <- dashboardHeader()
```

Empty Dashboard

- `header <- dashboardHeader()`
- `sidebar <- dashboardSidebar()`
- `body <- dashboardBody()`

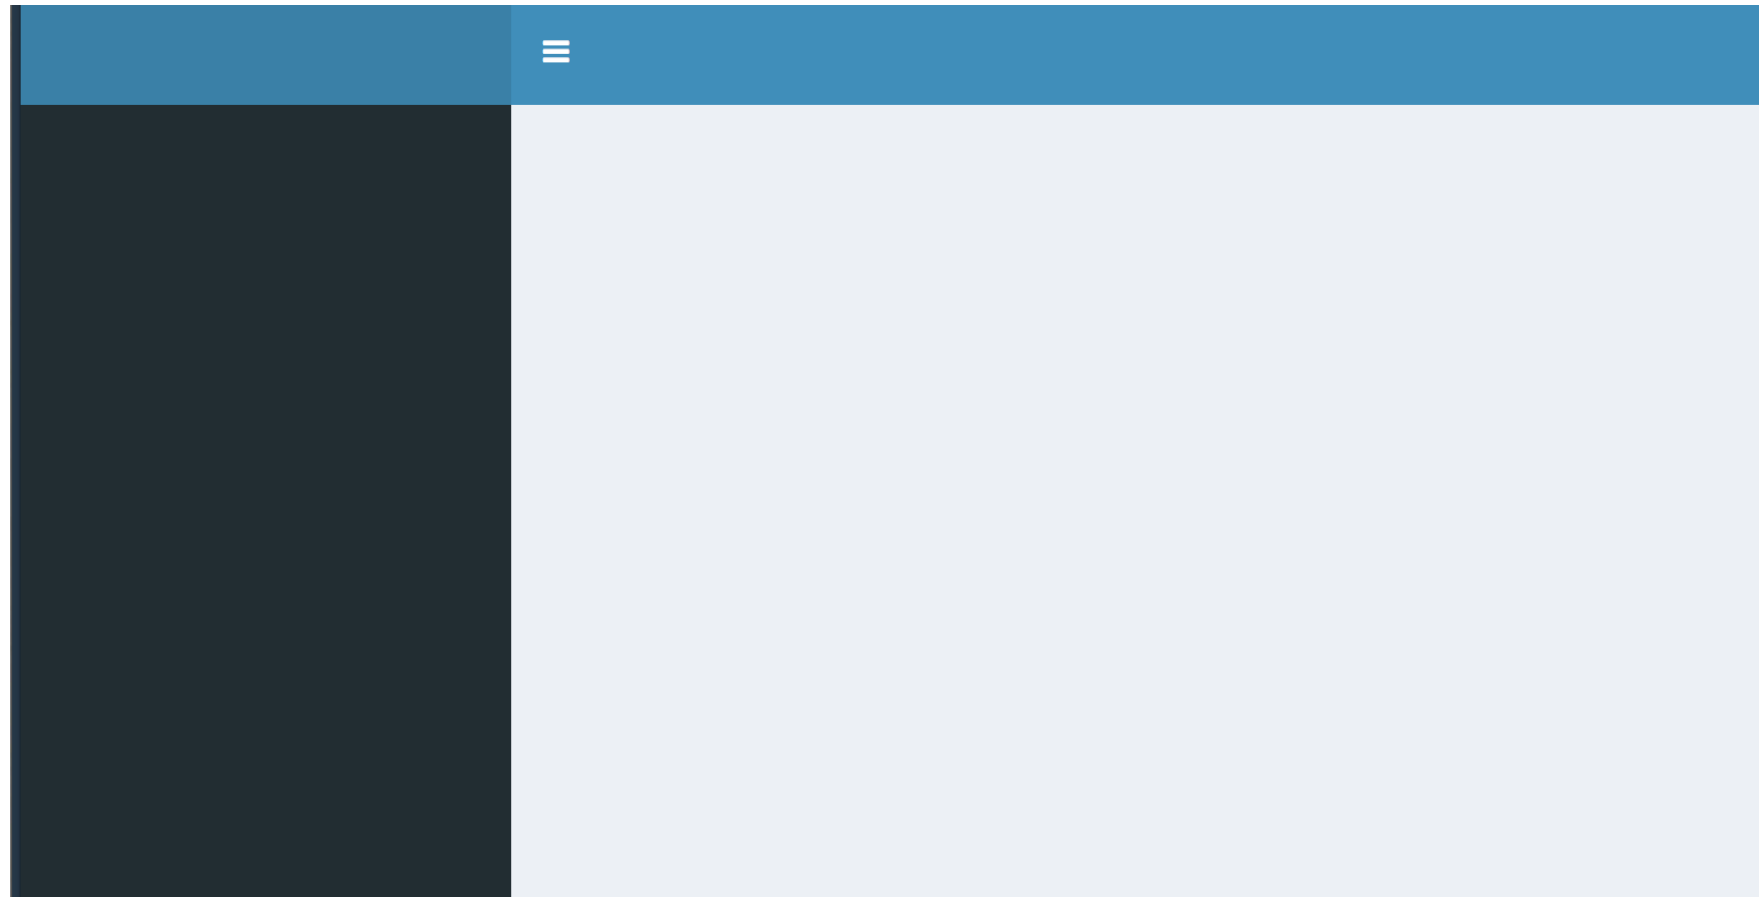

Empty Dashboard

```
ui <- dashboardPage(header, sidebar, body)
```

Empty Dashboard

```
server <- function(input, output) {}  
shiny::shinyApp(ui, server)
```

Let's practice!

Shiny Dashboard Header

Dropdown Menus

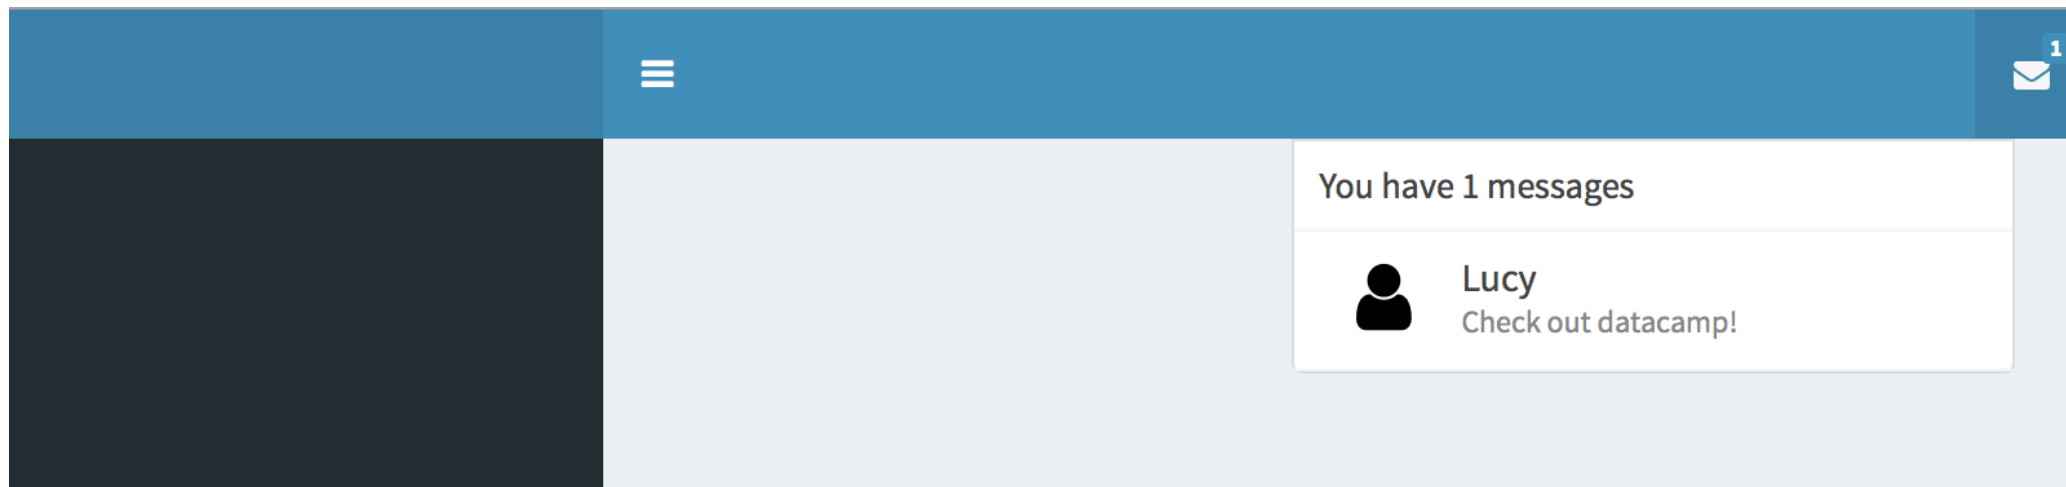

- Messages
- Notifications
- Tasks

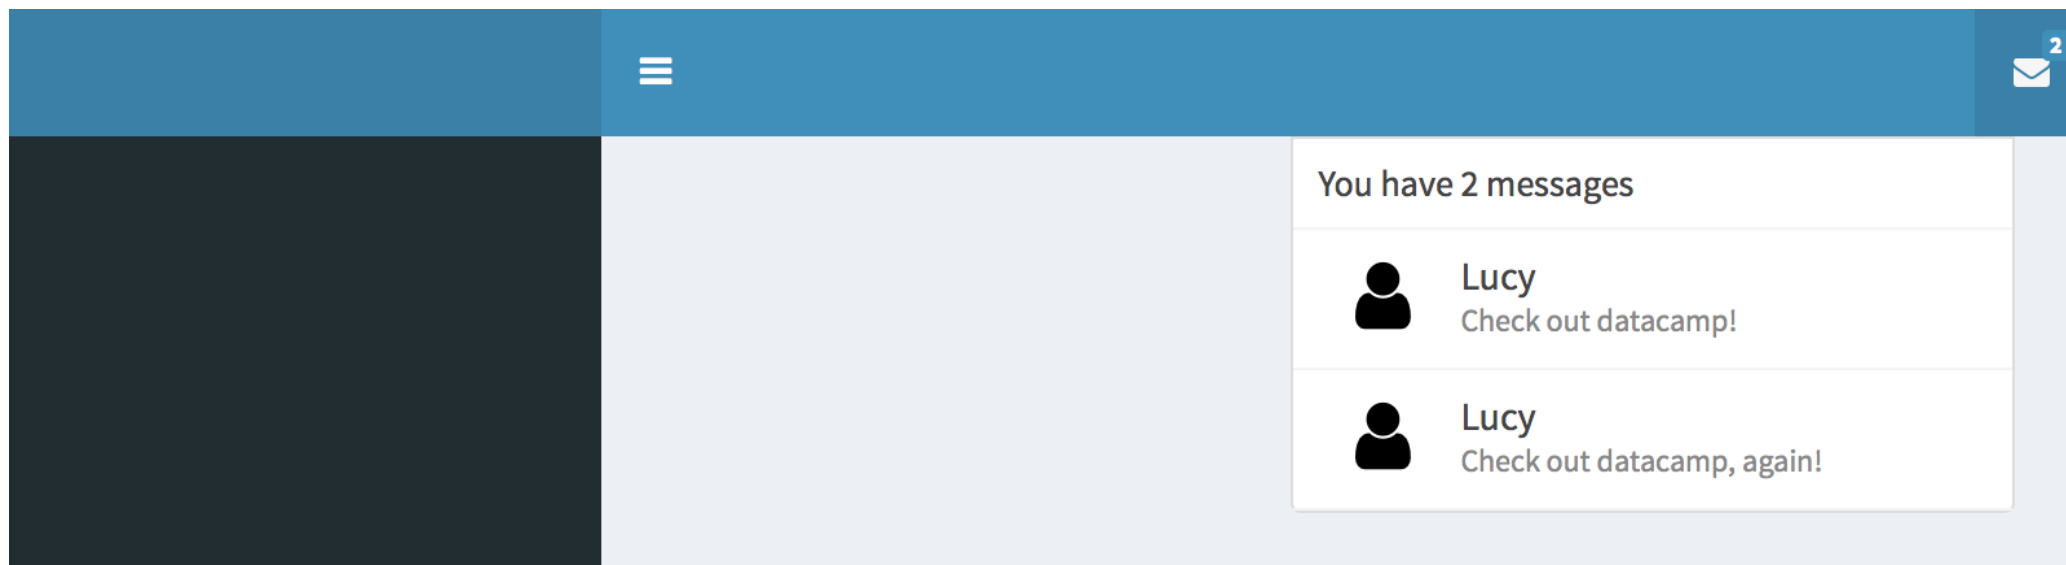

Message menu

```
header <- dashboardHeader(  
  dropdownMenu(type = "messages")  
)
```

```
header <- dashboardHeader(  
  dropdownMenu(  
    type = "messages",  
    messageItem(  
      from = "Lucy",  
      message = "Check out datacamp!",  
      href = "http://www.datacamp.com"  
    )  
  )  
)
```

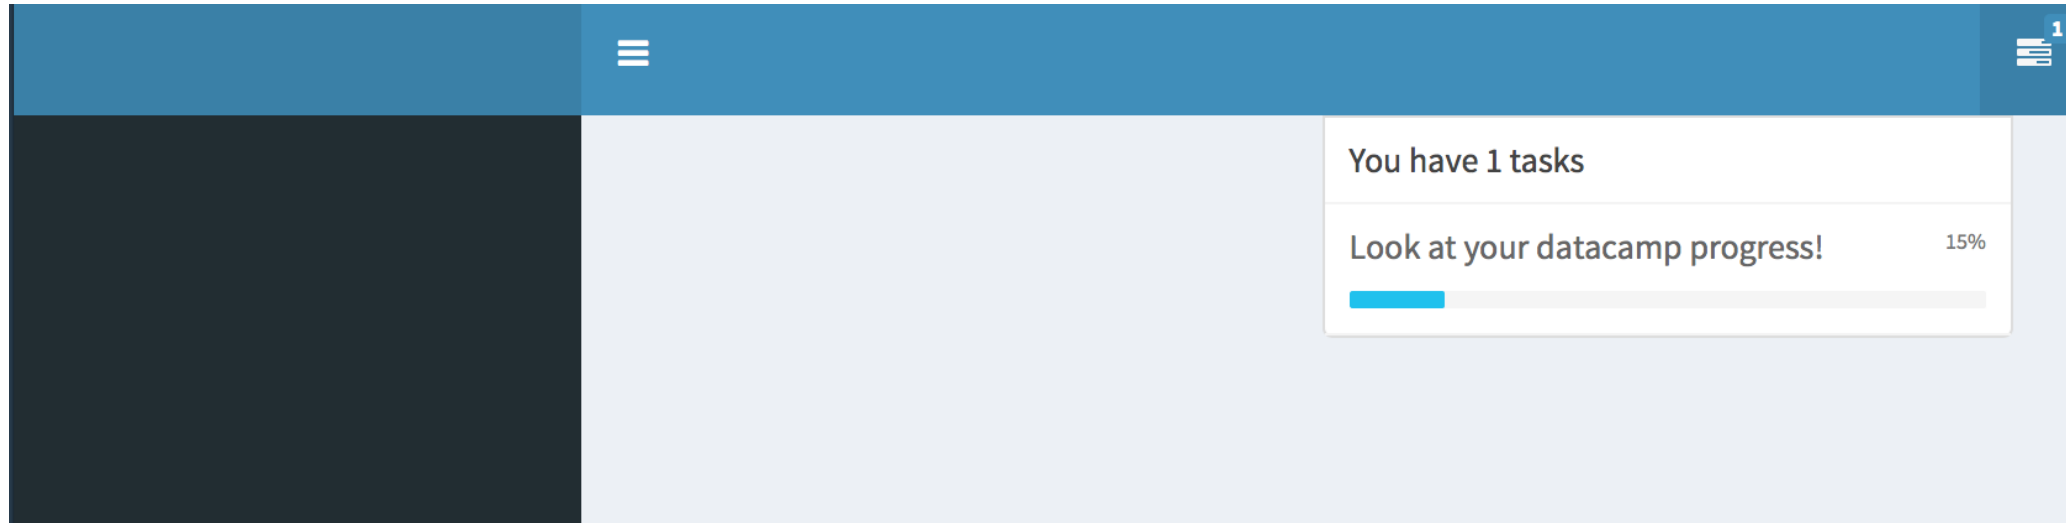

```
dropdownMenu(  
  type = "messages",  
  messageItem(  
    from = "Lucy",  
    message = "Check out datacamp!",  
    href = "http://www.datacamp.com"),  
  messageItem(  
    from = "Lucy",  
    message = "Check out datacamp, again!",  
    href = "http://www.datacamp.com")  
)
```

Notification Menu

```
header <- dashboardHeader(  
  dropdownMenu(  
    type = "notifications",  
    notificationItem(  
      text = "Check out datacamp!",  
      href = "http://www.datacamp.com"  
    )  
  )  
)
```

Tasks Menu

```
header <- dashboardHeader(  
  dropdownMenu(  
    type = "tasks",  
    taskItem(  
      text = "Look at your datacamp progress!",  
      value = 15  
    )  
  )  
)
```

Sidebar

```
sidebar <- dashboardSidebar()
```

```
sidebar <- dashboardSidebar(  
  sidebarMenu(  
    menuItem("Data",  
      tabName = "data")  
  )  
)
```

```
sidebar <- dashboardSidebar(  
  sidebarMenu(  
    menuItem("Data",  
              tabName = "data"  
            ),  
    menuItem("Dashboard",  
              tabName = "dashboard")  
  )  
)
```

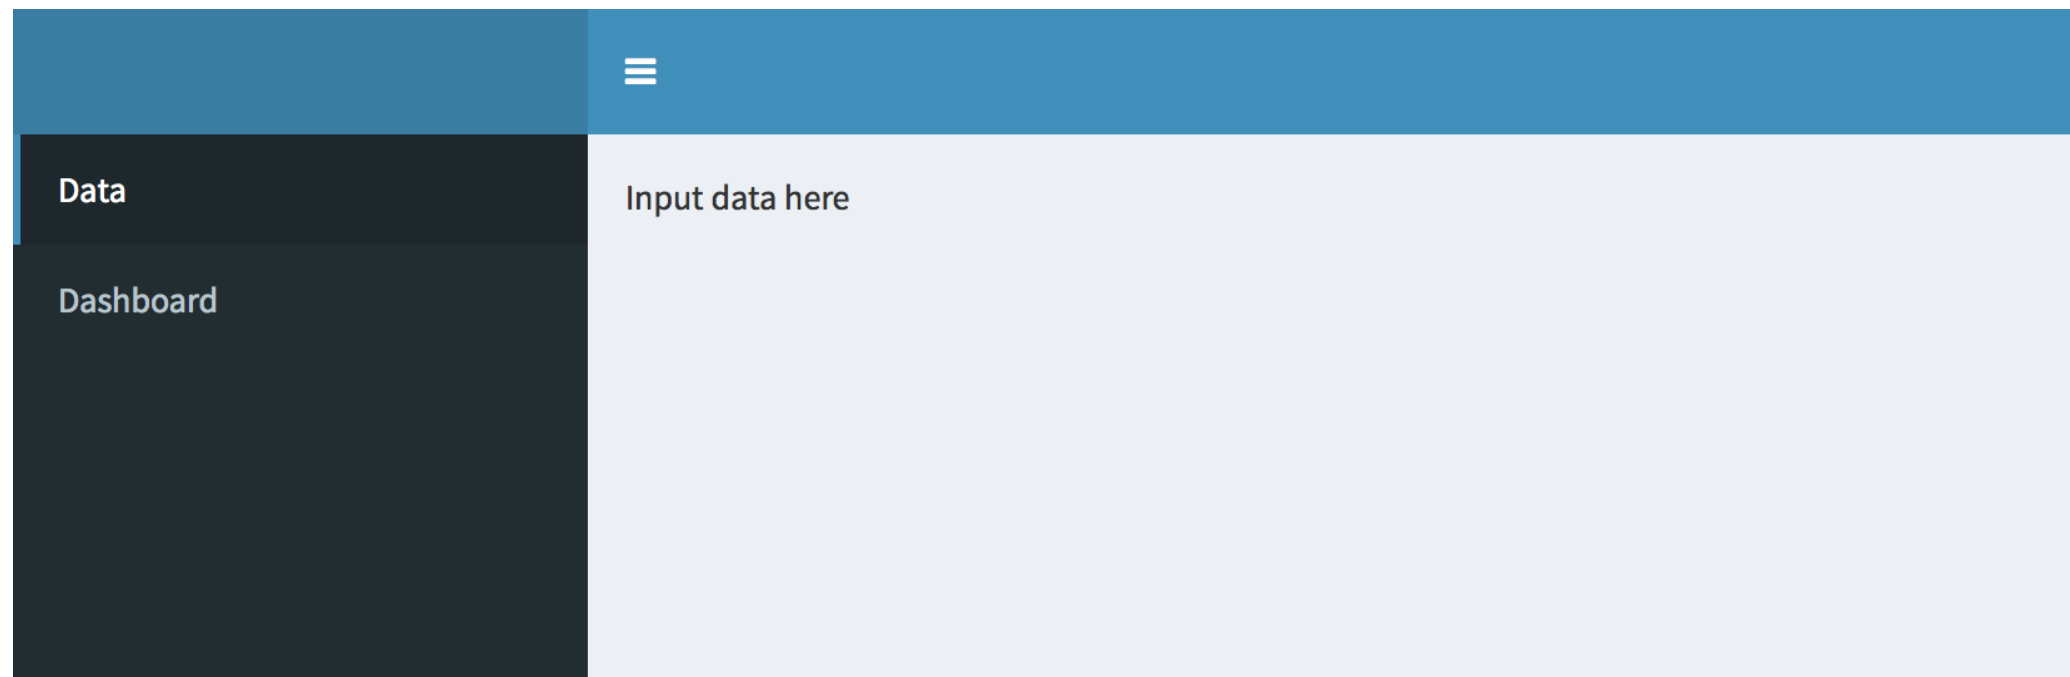

Body

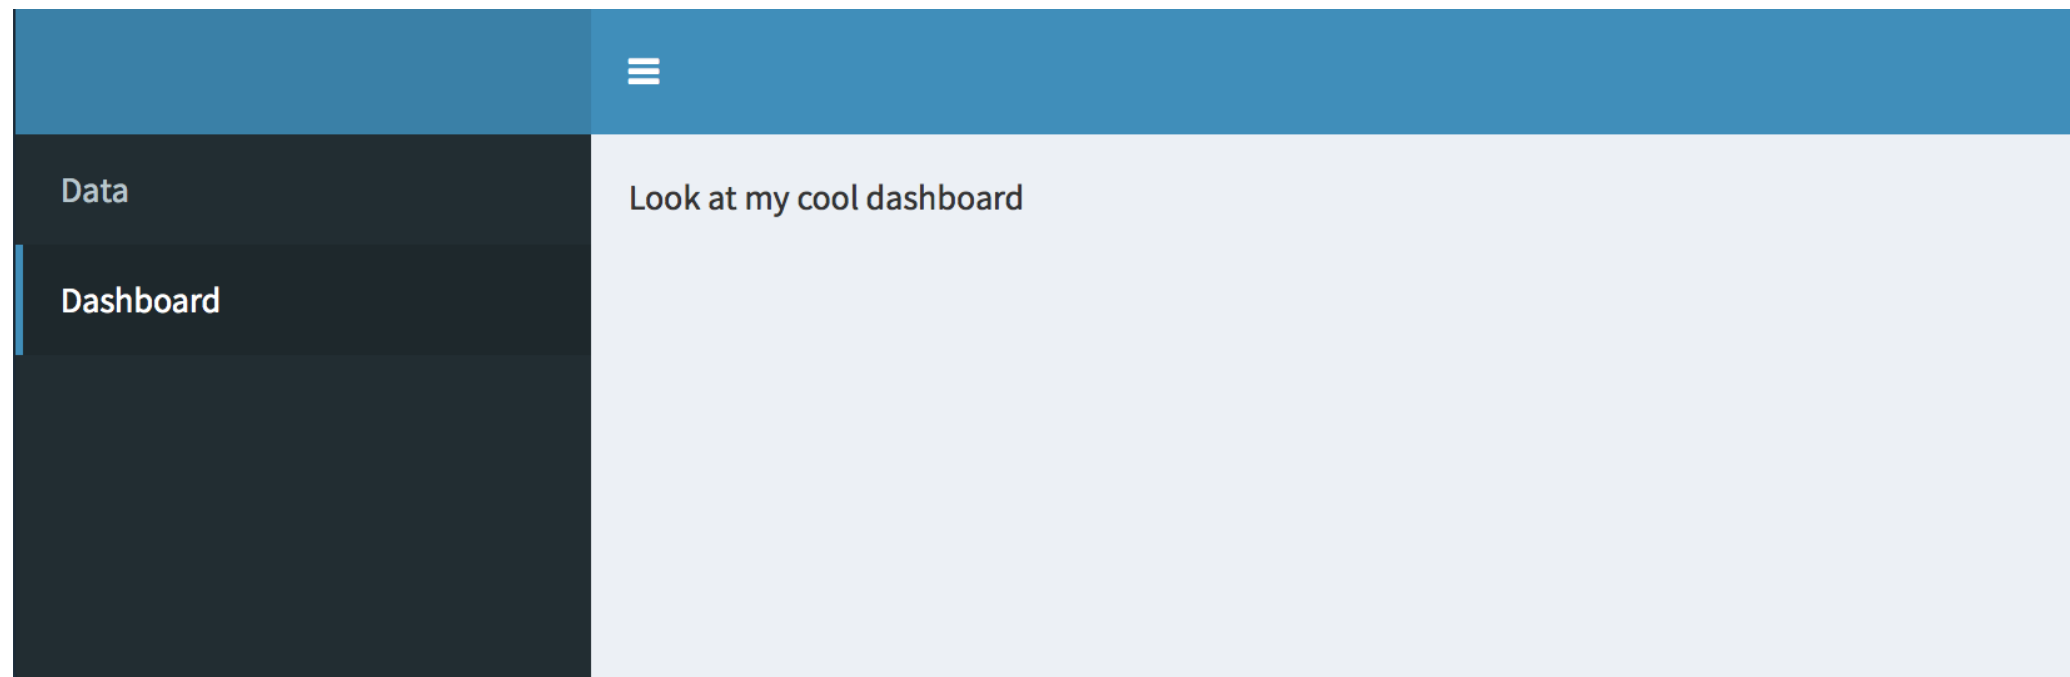

```
body <- dashboardBody()
```

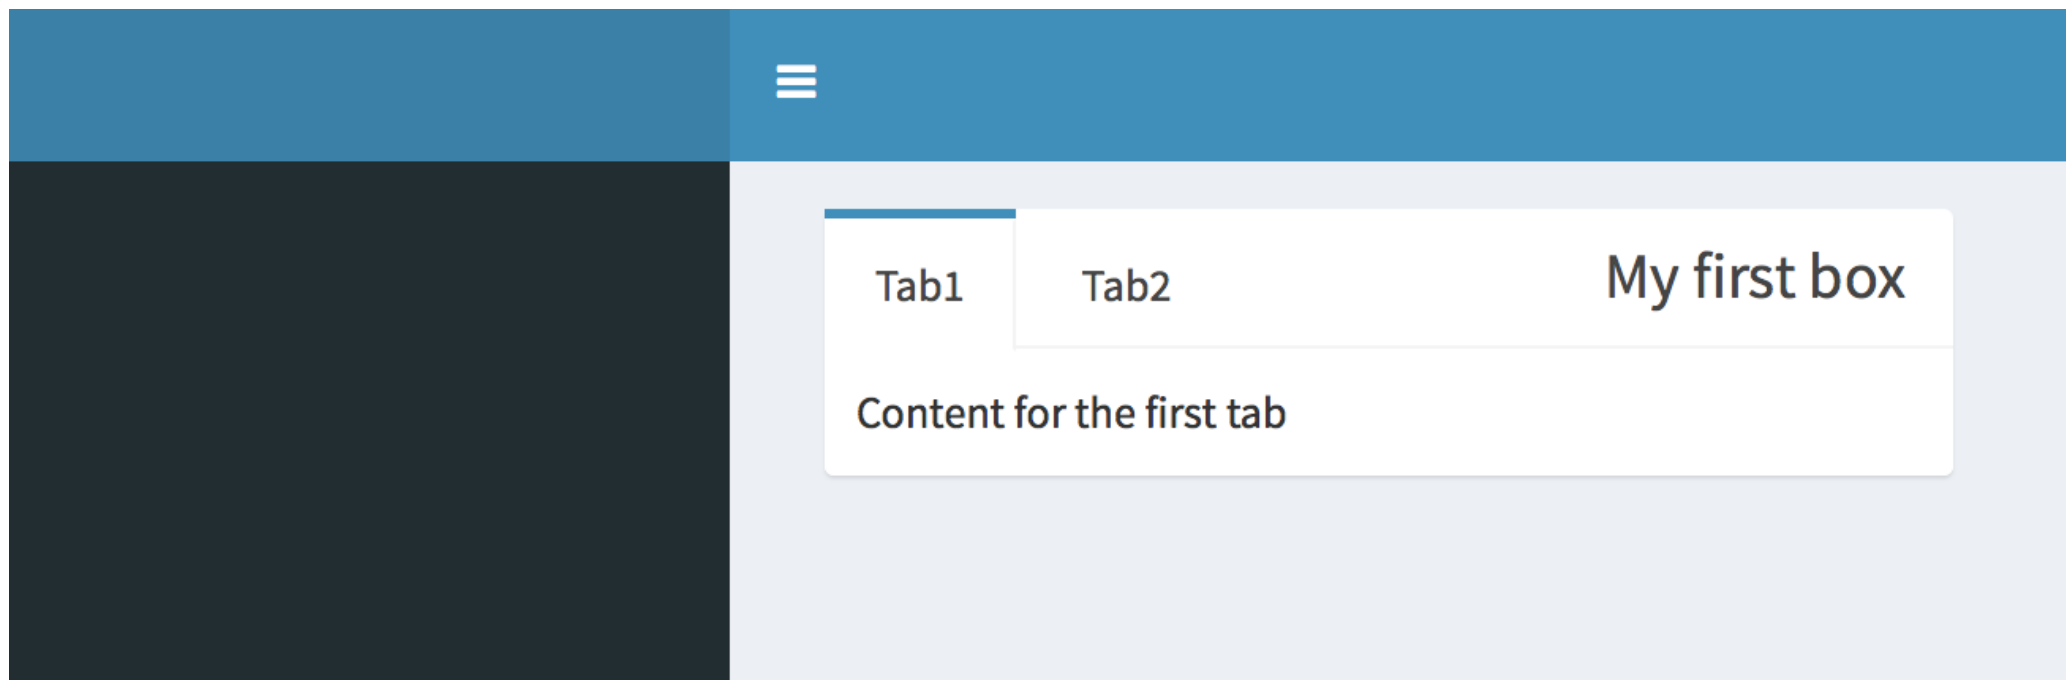

```
body <- dashboardBody(  
  tabItems(  
    tabItem(tabName = "data"),  
    tabItem(tabName = "dashboard")  
  )  
)
```

```
body <- dashboardBody(  
  tabItems(  
    tabItem(tabName = "data",  
            "Input data here"),  
    tabItem(tabName = "dashboard",  
            "Look at my cool dashboard")  
  )  
)
```

```
body <- dashboardBody(  
  tabItems(  
    tabItem(tabName = "data",  
            "Input data here"),  
    tabItem(tabName = "dashboard",  
            "Look at my cool dashboard")  
  )  
)
```

```
body <- dashboardBody(  
  tabBox(  
    title = "My first box",  
    tabPanel("Tab1", "Content for the first tab"),  
    tabPanel("Tab2", "Content for the second tab")  
  )  
)
```

Your turn!
